

Barclay
AH, AK, Fred McChesney, MM, AS

11/9/81

(by F. McCh, per MM)

① Initial confusion, re purpose of meeting:
Barclay, in FTC method lab. AH has had
to clarify that it was former, tho curious
about budget. McChesney, MM: no intention
or talk of curtailing either lab or Barclay
investigation. Lab no particular desire.

Not
question
variable
of human
smoking.
② AK: FTC method great example of joint-industry
coop; works fine except for Barclay. Pres
disappointed (AK - thumb in dike) by FTC handling.
Great historic problem: FTC can't act quick
enough to satisfy business people (McChesney -
entirely Skeptre & Johnson - Exxon case - "I know")
MM tried machine (convinced). AK on Dilution.

③ McChesney: no delays since 10/1. Forging ahead
to staff memo on or before 11/20. Comm prepared
to act quickly as soon as staff request rec'd.
No waning of interest in this matter - will not
laguish. But must be careful.
